Web Application Firewalls

Ruthin aireni

System Audit | Ai Developer intern | Ai Automation | DevOps| CI/CD |
Azure | AWS
Hyderabad, Telangana, India

Summary

I am currently working as an EDP Executive with hands-on experience in IT operations, system maintenance, and Level 1 (L1) support, including troubleshooting hardware, software, and network-related issues. Alongside my professional role, I have developed a strong interest in Artificial Intelligence, particularly in AI tools, chatbots, and Large Language Models, n8n automation. I have practical experience in working with AI-based workflows, prompt engineering, and building automation solutions to improve efficiency and reduce manual effort. I have independently built AI-driven applications and automation workflows (hosted in private repositories), where I explored chatbot development, prompt optimization, and integration of AI tools into real-world use cases. I am continuously expanding my skills in AI, cloud technologies, and DevOps practices, with a focus on building scalable and efficient solutions that align with modern industry needs.

Key Areas of Interest:

- * AI Tools & Chatbot Development
- * Prompt Engineering & LLM Applications
- * Automation Workflows (API / No-code / Low-code)
- * IT Support & System Operations
- * ykuka, Cloud & DevOps (Azure, Docker, Kubernetes)kuky

Experience

RSB RETAIL INDIA LIMITED

System Auditor
October 2025 - Present (8 months)
Hyderabad

EDP Executive with experience in IT support, system operations, and audit processes. Skilled in L1 troubleshooting, network issue resolution, and user support. Experienced in system and stock audits, including verification and data management. Focused on ensuring smooth IT operations and continuous improvement.

VISWAM.AI

Ai developer intern

July 2025 - May 2026 (11 months)

Hyderabad, Telangana, India

Building real-world AI solutions using Python, DevOps, and Transformer models (like GPT & BERT)

Hands-on learning with RAG (Retrieval-Augmented Generation)

Collaborating with peers to contribute to the Telugu LLM – India's foundational language model

Following structured workflows for deploying and evaluating impactful AI systems.

and many more learn during the process

Vcube Software Solutions

Intern

November 2024 - June 2025 (8 months)

Kphb Hyderabad, Telangana, India

Worked on real-time cloud infrastructure projects using AWS and Azure, including Terraform-based automation, VM provisioning, and CI/CD pipeline setup

Delivered in-lab training and technical support to students, guiding them through hands-on cloud labs and DevOps tools like Docker, Azure DevOps, and Kubernetes

Explained complex topics such as Infrastructure as Code (IaC), networking in Azure, and pipeline stages in a clear, student-friendly manner

Created and distributed custom learning materials, including PDF notes, tool usage guides, and step-by-step lab tutorials

Balanced technical project work with active mentorship, improving student understanding and increasing engagement during sessions

Collaborated with senior engineers to troubleshoot infrastructure issues and monitor systems using Prometheus and Grafana

Practiced version control with Git and contributed to team-based workflows using agile methodology

Education

JNTUH College of Engineering Hyderabad

Bachelor of Technology - BTech, Mechanical Engineering · (July 2019 - January 2024)
